

Health Education in American Sign Language

DeafHealth.org now has information about Ebola. Under the initial "Overview" video, you can watch other videos, including:

- What are the Symptoms of Ebola?*
- How is Ebola Transmitted?*
- How is Ebola Prevented?*
- How is Ebola Diagnosed?*
- How is Ebola Treated?*

Click the text or picture below to learn more.

WEST AFRICA Ebola Outbreak

Early Symptoms:

Ebola can only be spread to others after symptoms begin. Symptoms can appear from 2 to 21 days after exposure.

- **Fever**
- **Stomach pain**
- **Headache**
- **Muscle pain**
- **Diarrhea**
- **Unexplained bleeding or bruising**
- **Vomiting**

Facts *about* Ebola

You can't get Ebola through air

You can't get Ebola through water

You can't get Ebola through food

Special thanks to:

The Ohio State University
Wexner Medical Center for
partnering with DeafHealth to
help create this very
important health information.

InDemand Interpreting:

Dedicated to Your Health & Proud Supporter of DeafHealth.

In healthcare, communication must be clear and accessible. That's why our ASL team is RID certified and has medical interpreting expertise. We are dedicated to providing high-quality immediate access to medical interpreters 24/7/365.
